EPW COUNTERMEASURES: DEFINITION OF TERMS

TYPE:

Passive: Countermeasures that require no active detection of or response to an EPW penetration.

Active: Countermeasures that require an active response upon detection of an EPW penetration.

Non-specific: Countermeasures not specifically aimed at EPWs, but serve a more general role in tactical and strategic defense.

STATUS:

Current: Currently being investigated by the EPW Countermeasures Working Group.

Open: Not currently being investigated by the EPW Countermeasures Working Group.
